

# WHAT IS GF-6?

## NEW OIL STANDARD MOVING FORWARD FOCUSED AGAINST REDUCING ENGINE WEAR, LSPI & IMPROVING FUEL ECONOMY

- Helps reduce engine wear: For example, there is a new timing chain wear test
- Added protection against LSPI (Low Speed Pre-Ignition)
  - Tendency of newer, small-displacement, turbocharged direct fuel injected engines to pre ignite at lower RPMs
- Increase fuel economy to meet higher CAFE requirements

## NEW API LICENSE IS SP/ILSAC GF-6 WHICH IS BACKWARDS COMPATIBLE WITH API SN PLUS/GF-5, SN, ETC.

- Initial date in market is May 1

## BEL-RAY BRX MOTOR OILS ALREADY MEET API SP/GF-6 STANDARDS
