

WHAT IS GF-7A/B?

The new GF-7A/B oil standard is focused on reducing engine wear, engine deposits, LSPI, and improving fuel economy

- Fortified with anti-wear additives to maximize engine durability
- Engine deposits control with more stringent requirements for piston cleanliness
- Robust pre-ignition performance via LSPI (low speed pre-ignition) control, which is important for modern TDI (turbocharged, direct fuel injected) engines
- Formulated for improved fuel economy to meet higher CAFE requirements

The new licenses are API SQ and ILSAC GF-7A/B, which are backwards compatible with API SP and ILSAC GF-6A/B

- First License in market is March 31, 2025

Current API SP/GF-6A/B Bel-Ray® BRX™ Motor Oils already meet API SQ/GF-7A/B standards

- Bel-Ray® BRX™ Motor Oils are formulated to exceed the toughest industry standards
